

I am sick and tired of people telling me what I can and can't listen to. This is America, you know the home of freedom. It appears that you are taking away my freedom. First I can't listen to Bubba the love sponge any more, because one person can't control his children, and he knows somebody that can make a difference so that he doesn't have to control his children. I have 2 children, and they have never heard Bubba on the radio. It's called having control over raising your kids. Now I can't even pay for satellite radio and receive instant traffic and weather, because once again someone at the top knows someone, and that person can make the difference for them, so they don't lose out or have to control their business. It seems that commissions like yours are taking away our rights. Maybe if this wasn't the United States I could understand that, but it is the United States, where we stand for Freedom, and equal for all. So let's be equal to all. Not all of us have thousands and thousands of dollars to spend on officials to change the laws so that they benefit us personally or our business. Thank you
